PROJECTS

Smart Village

(August 2024 - December 2024)

Customer	Community
Description	Rural services are built on digital platforms with smart, cost-effective, and eco-friendly solutions, offering convenient and interactive services to rural residents. These services include online public services for quick administrative tasks, field reporting for local issues, and rural reporting to improve community life. Additionally, traceability solutions allow citizens to verify product origins, ensuring transparency and quality in the supply chain.
Team size	6
My position	Intern
My responsibilities	<ul style="list-style-type: none">- Cut the interface from Figma to the web using Vue.js and Bootstrap.- Convert the design into HTML, CSS, and Vue components.- Ensure the interface is responsive across all devices.- Optimize the interface for performance and user experience.
Technologies used	HTML, CSS, Javascript, Vue, BootstrapVue

Internal System Development

(April 2024 - June 2024)

Customer	Company
Description	<ul style="list-style-type: none">- Internal system management functions include employee information management, work assignment, and performance tracking. The system monitors project progress, identifies milestones and work statuses, and assigns user rights to ensure efficient management and access to information. Users appropriate for the new project include project managers to track progress and assign tasks, employees to perform work and report results, and administrators responsible for system management and user rights assignment.
Team size	8
My position	Intern
My responsibilities	<ul style="list-style-type: none">- Write API using Spring Boot to record user activities.- Use MySQL to store data log activities.- Record events such as login, login and data edit.- Create RESTful API to retrieve and manage log activities.
Technologies used	<ul style="list-style-type: none">- Spring Boot, Bootstrap, MySQL
